

Save time and labor when field-fabricating crickets with 4'x8' Q-panels.

Introducing EnergyGuard® Tapered Polyiso Insulation 4'x8' Q panels for use when field fabricating tapered crickets. Larger panels result in faster installation, decreased number of panels handled, fewer cuts, and less waste. Product is available in 20 and 25 psi, GRF or CGF facer and NH formulations. Contact your Tapered Design specialist: tdg@GAF.com or 866-207-7123.
