TPO Primer, TPO Seam Cleaner, TPO Quick Spray Adhesive, and TPO Quick Spray LV50 Adhesive Announcement

Commercial Sales Team,

We are pleased to announce the launch of a GAF industry first: an exclusive line of aerosol primer, cleaner, and adhesive, for TPO.

These products represent a key addition to our current TPO repair and maintenance offering, helping contractors to save time and money on a wide range of projects. The aerosols utilize our tried and tested formulas for TPO Primer, TPO Seam Cleaner, TPO Quick Spray Adhesive, and TPO Quick Spray LV50 Adhesive. The cans are packed 12 per carton, and each box features a tear-away top that makes restocking and display extremely easy. The four new aerosols are:

Item Code	Description	Packaging	TDS & SDS
7792 A	EverGuard® TPO Quick Spray Aerosol Adhesive	12 cans per carton 90 cartons per pallet	TDS SDS
7801 A	EverGuard® TPO Quick Spray LV50 Aerosol Adhesive	12 cans per carton 90 cartons per pallet	TDS SDS
7793 A	EverGuard® TPO Aerosol Seam Cleaner	12 cans per carton 90 cartons per pallet	TDS SDS
755 DA	EverGuard® TPO Aerosol Primer	12 cans per carton 90 cartons per pallet	TDS SDS

A retail-friendly display has also been created to showcase these products, along with our other repair and maintenance items, in the front room of your distributor customers. The combination of the tear-away box and display creates a great TPO Repair and Maintenance one-stop shopping destination for time-savvy roofers.

These products will be available for fulfillment from our Gainesville, Texas warehouse. Expansion to other stocking locations is being actively investigated. Drop shipping is also available. Pricing for these products has been added to your regional TPO price lists. Rather than creating a separate TDS for each of these products, we've updated

We protect what matters most™

the existing TDS for cleaner, primer and adhesive by adding the aerosol version to each. Our website pages have also been updated by adding the aerosols to the existing formula pages. However, separate SDSs for each have been created and are available on the website.

The shelving displays being shipped to distribution feature a top shelf measuring 48" wide, designed to hold a single row of any four aerosol boxes, while the bottom two shelves, measuring 48" wide and 24" deep, can accommodate two rows of any four aerosol boxes or other repair and maintenance products. These displays are provided to distributors free of charge with the purchase of a full pallet of aerosols.

Stay tuned for more marketing collateral to follow. For any additional questions or information, please feel free to reach out to Brad Clark or Michael Cukrow.

Thank you.
