THE AMERICAN INSTITUTE OF ARCHITECTS CONTINUING EDUCATION SYSTEM
AIA / CES APPROVED PROVIDER PROGRAM SUMMARY

THE ART OF TERRA COTTA & COLOR

This one hour program explores the art of terra cotta, beginning with a quick overview of the manufacturing process, covering the natural variation in clay tile along with the glazing techniques to achieve the desired color. This course also focuses on the color selection and matching process to custom and historic profiles.

LEARNING OBJECTIVES

- ◆ Communicate the various color opportunities and capabilities of standard colors, glazing techniques, custom color development and color by hues.
- ◆ Discuss overall expectations regarding color matching, color blending and sampling.
- ◆ Review the step by step color matching process and specific case studies in regards to custom color development and historic preservation projects

FACILITATOR QUALIFICATIONS

- ◆ All Ludowici facilitators have been trained on CES guidelines and presentation skills and will be very knowledgeable on building and construction products.

METHOD OF DELIVERY

- ◆ The CES facilitator utilizes a Power Point slide presentation to provide an in-depth overview of clay roofing tiles.

AUDIO/VISUAL REQUIRED

- ◆ Electrical power and a screen for the Power Point slide presentation.

COST TO PARTICIPANTS

- ◆ There is no cost for this presentation.
